

ESTRINI 50+

SKIN RE-SCULPTURE AND RE-STRUCTURE

Phytrodial - 8-Phytoestrogen system | Low Molecular Weight Peptides | Advanced Anti-Ageing Formulas

WOMEN YOUTH FOUNDATIONS 50+

Intensively rejuvenating programme for mature women aimed at the renewal of skin sculpture and structure, inspired by the latest results of pharmaceutical laboratory research and clinical trials. Provides strong-action fundamental youth ingredients to skin requiring "increasing skin density", which boosts elastic supporting fibres' re-structuring processes and increases DEJ compactness, reducing deep structural wrinkles, restoring moisture and elasticity as well as leaving skin luminous.

ESTRINI 50+ programme is based on highly active ingredients, i.e. formulas of phytoestrogen complexes, unique anti-ageing ingredients and strong low molecular weight peptides as well as anti-oxidants.

ESTRINI 50+ ACTIVE FORMULA

PHYTRODIAL is a strong-action formula of selected phytoestrogens from 8 original plants with clinically proven effects of estrogen shortage replenishment and reducing atrophic skin changes caused by hormonal imbalance. Stimulates the synthesis of type IV and VII collagen, strengthens the dermal-epidermal junction DEJ, increases microcirculation. Improves elasticity, firmness, blood circulation and skin tone.

MATRIXYL 3-Peptide strong anti-aging, low molecular weight peptide, stimulates the synthesis of main components of the dermal matrix and the dermo-epidermal junction, including type I, III, IV collagen and hyaluronic acid. Improves skin hydration, density, firmness and elasticity, tone and face oval. The effectiveness is confirmed by the in vivo panel study on a cohort of 25 women aged 42 -70 years.

SYNPEPT 2-Peptide low molecular weight peptide complex with smoothing and anti-wrinkle properties, increasing skin elasticity. Strengthens the dermal-epidermal junction (DEJ) that maintains the cohesion of the dermis and epidermis, thus restoring firmness and elasticity. The main component of the DEJ are collagen fibers of type IV, VII, XVII and laminin V.

MENOSKIN multifunctional active substance from the fungus *Poria Cocos* used in traditional Chinese medicine; stimulates the production of hyaluronic acid, type IV collagen and proteins affecting cohesion, thickness and brightness of the skin.

ALLANTOIN VC vitamin C complex with allantoin. It combines the whitening, antioxidant and anti-aging effects of vitamin C with the soothing and moisturizing effect of allantoin. It protects against free radicals and UV damage, reduces the effects of photoaging and skin aging.

Vitamin D Booster - polysaccharides obtained from chicory root. The ingredient works in a similar way to vitamin D - it restores the functions of the vitamin D receptor (VDR), stimulates the molecular network involved in the differentiation of keratinocytes, and accelerates the regeneration of the skin's protective barrier.

RED CORAL ALGAE (*Corallina Officinalis*); an extract rich in magnesium and calcium, which contribute to the maintenance of the skin's hydro-lipid balance, and improve its elasticity and hydration. They also have antioxidant and antibacterial properties.

RED ALGAE CARRAGEEN MOSS growing along the Atlantic coast; contains carrageenan, provitamin A and mineral salts. This algae has cooling, moisturizing and soothing properties.

HIGH MOLECULAR WEIGHT HYALURONIC ACID 1MDa with a unique ability to bind water in epidermis, highly moisturises and smoothes the skin and protects it against loss of elasticity. Creates occlusive epidermis protection.

ALBUM SANDALWOOD OIL the most valuable variety of Indian sandalwood album, valued in ancient Egypt, an integral part of Ayurvedic medicine. Has calming, soothing and antibacterial, but also antidepressant and harmony-restoring properties.

ACTIVE FORMULA ENRICHED WITH EXTRACTS:
ROSEMARY, HOP, HAMAMELIS, SAGE, HORSETAIL, LEMON, ASIAN PENNYWORT,
PINE, LICORICE, MILK THISTLE, BLACK COHOSH, WILD YAM,
