

SENSITIVE SMART INFLABIOME

INTELLIGENT SOOTHING AND REJUVENATION OF SENSITIVE SKIN

Anti-Stress & Redness | Anti Inflamm-Ageing | Microbiome Restore

Advanced product line to soothe and rejuvenate sensitive, dry, mature skin

Reduces the effects of inflammation and neurogenic stress

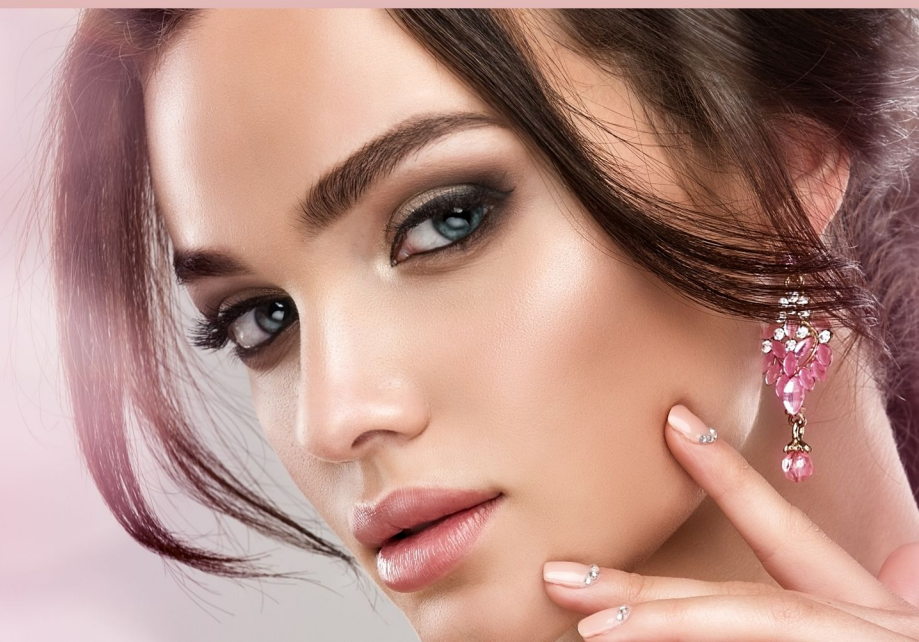

Counteracts chronic inflammatory ageing Inflamm-Ageing

Reduces erythema, regenerates the microbiome and the epidermal barrier function

Year-round treatment

PHOTODYNAMIC METHOD PDT
LASER LLLT / LED
R 650nm, Green 525nm, UV 420nm
or SONOPHORESIS

SENSITIVE SMART INFLABIOME

INTELLIGENT SOOTHING AND REJUVENATION OF SENSITIVE SKIN

Advanced product line to soothe and rejuvenate, counteracts the effects of neurogenic stress and inflammation due to chronic inflammatory ageing - Inflamm-ageing.

Reduces erythema, lifts and strengthens face oval, regenerates the microbiome and the skin barrier function.

INDICATIONS:

- skin with neurogenic stress symptoms, sensitive, reactive, prone to redness, dry, mature, vascular, with symptoms of rosacea
- skin with signs of premature ageing, uneven skin tone, grey, dull, losing elasticity, with wrinkles
- preparation of the skin for cosmetic and aesthetic medicine procedures in order to increase its potential for regeneration and reconstruction

TREATMENT EFFECTS:

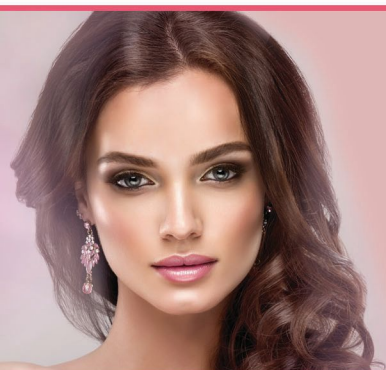

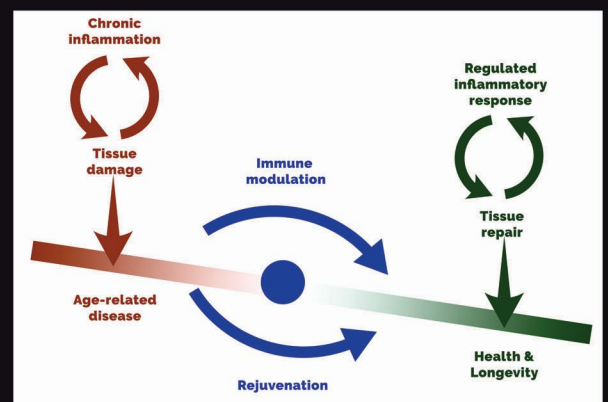

- soothed and comforted skin, reduced neurogenic skin stress and erythema
- regenerated microbiome and strengthened integrity of the skin barrier
- lifting and reduced wrinkles, improved elasticity and skin tone
- prevention of premature ageing

INFLAMM-AGEING – CHRONIC INFLAMMATION-INDUCED AGEING WHAT IT MEANS AND WHAT ARE THE IMPLICATIONS FOR SKIN AGEING

Inflamm-ageing is one of the theories regarding the causes of skin ageing and indicates chronic inflammatory processes as the cause of this process. Inflammation is a natural defence response of the entire body, including the skin. It is a defence process against pro-inflammatory bacterial and viral agents as well as stress and toxic stimuli. This process initiates the repairing of damage in the cells.

Normal short-term inflammation is an integral part of the healing process and an ally of damage repair. However, if the inflammation is continuously over-stimulated due to signals misread by the immune system, it develops into a so-called chronic, low-grade inflammation. This marks the onset of the so-called Inflamm-Ageing or inflammatory skin ageing. This directs the forces of the immune system and cellular energy to fight the irritants, which impairs or prevents natural cell renewal.

The immune system is a complex system of immune cells working together, including Langerhans cells, macrophages and dendritic cells. It is designed to efficiently respond to irritants and repair damage. It is composed of both pro-inflammatory and anti-inflammatory mediators. In response to increased pro-inflammatory irritants - it releases anti-inflammatory mediators **to restore balance and attempts to protect the weakened skin barrier at the same time.**

Acting in a feedback loop, a cascade of defensive actions against inflammation is triggered. This forces the mitochondria to increase cellular energy production to combat constant inflammation. The excess of inflammatory cytokines (the three most important ones causing irritation are: IL-1 α , IL-8 and TNF- α), i.e. pro-inflammatory mediators, over anti-inflammatory mediators results in skin irritation and chronic inflammation, leading to skin damage.

SENSITIVE SMART INFLABIOME

SENSITIVE SKIN AND CHRONIC INFLAMMATION-INDUCED AGEING - INFLAMM-AGEING

Skin inflammation is linked to causes of skin ageing (this is one of the theories of skin ageing). It affects all skin types, **but sensitive skin is particularly vulnerable**. It has an increased sensitivity to internal and external stimuli. Common symptoms include stinging, itching, burning, erythema, redness, papules or blisters, dryness, flaking. Factors that influence the reactions of sensitive skin can be psychological (stress, emotions), environmental (pollution, smog), physical (UV radiation, heat, cold, stimulants, detergents, diet), or hormonal.

MAIN FACTORS AFFECTING SENSITIVE SKIN

- **EPIDERMAL BARRIER CONDITION** – influenced by increased permeability of the stratum corneum, increased transepidermal water loss (TEWL) and increased activity of pro-inflammatory factors.
- **PRO-INFLAMMATORY NERVOUS REACTIONS** - accelerating inflammatory changes due to stressors.
- **SKIN MICROBIOME** - on which the skin's resistance to pro-inflammatory agents depends. An imbalance in the microbiome can increase adverse symptoms in sensitive and reactive skin.

IMPORTANCE OF THE MICROBIOME FOR THE EPIDERMAL BARRIER AND INFLAMMATORY AGEING

The skin microbiome is a complex ecosystem made up of symbiotic micro-organisms, namely bacteria, fungi, mites and viruses. They live in homeostasis with the entire organism. The function of the microbiome is to provide protection against pathogens and to stimulate the immune system. Internal and environmental factors can disrupt its balance. It is the imbalance in the skin microbiome (dysbiosis of the microbiome) that increases the skin's susceptibility to the development of inflammation.

The skin, which forms a physical barrier and harbours the microbiome, is an integral part of the innate immune system, forming the **FIRST LINE OF DEFENCE AGAINST PATHOGENIC MICROORGANISMS**.

TREATMENT OF INFLAMM-AGEING SYNDROME

1. Strengthening of the natural skin microbiome.
2. Reduction of neurogenic inflammation - through antioxidant action.
3. Inhibition of the release of neurotransmitters involved in the formation of sensitivity.

STAGES OF INNOVATIVE DERMOTHERAPY

PEPTIDE-BASED SKIN SOOTHING AND STRESS REDUCTION

The product line uses **DERMOSOOTH P Pentapeptide 26**, a multifunctional anti-inflammatory peptide whose effectiveness has been proven in clinical studies.

- It inhibits the activity of Substance P- a neuropeptide synthesised and released from nerve fibres, which is responsible for the widening of blood vessels and an increase in their permeability. By inhibiting Substance P, the peptide reduces inflammation and irritation in the skin and prevents further inflammation. It decreases the expression and production of inflammatory cytokines, especially IL-1α, IL-8 and TNF-α, and consequently reduces skin redness, discomfort and itching.
- In addition, the peptide reduces transepidermal water loss TEWL and protects the skin against UV radiation.

IMMEDIATE LIFTING AND REDUCTION OF WRINKLES

Encapsulated extended-release DMAE (DEANOL) has a lifting, anti-inflammatory and antioxidant effect. It is a precursor of acetylcholine (a neurotransmitter) that improves the appearance of the skin with an immediate and long-term lifting effect. It reduces wrinkles, has strong anti-inflammatory, antioxidant and moisturising properties, expressly combats the signs of skin ageing; leaves the skin rejuvenated and smoothed, with visibly improved tone and firmness

SENSITIVE SMART INFLABIOME

REGENERATION OF THE MICROBIOME

NISIN is a bacteriocin that is antibiotic in nature. It is a peptide with antimicrobial activity - it destroys antibiotic-resistant bacteria. It counteracts Gram-positive and Gram-negative bacteria, moulds and fungi. Nisin is produced by biotechnological fermentation by the human skin friendly bacteria *Lactococcus Lactis*, which helps to maintain the natural microbiome.

STRONG ANTIOXIDANTS

The antioxidant action is supported by a **COMPLEX OF SODIUM LEVULINATE AND SODIUM SALTS OF ANISIC ACID**. It neutralises free radicals and helps to rebuild the integrity of the epidermal barrier. At the same time, it has rejuvenating, regenerating, antibacterial and antifungal properties. The antioxidant function is also fulfilled by **INFRA DNA-RENOVER**, which provides protection against IR radiation, including IR-A and against HEV blue light. It protects mitochondrial DNA from UV exposure and urban pollution.

MULTIDIRECTIONAL ACTION OF THE RICH ACTIVE FORMULA

- The rejuvenating, antibacterial anti-inflammatory functions are supported by, among others, **non-ionic gold and silver particles and gluconolactone**.
- The soothing, moisturising and capillary strengthening effect is provided by **sweet violet, sea-buckthorn and borage extracts**, as well as **hyaluronic acid**, which forms a protective moisturising film on the skin.
- The moisturising, anti-radical and soothing, as well as collagen synthesis stimulating effect is from **kiwi and papaya, strawberry, peach, apple, raspberry and cucumber extracts**.

EFFECT OF THE ACTIVE INGREDIENTS ON THE SKIN'S IMMUNE SYSTEM

1. Line of defence Stratum corneum	2. Line of defence of stratum corneum	3. Regeneration and rejuvenation of epidermis and dermis
- slightly acidic - skin microbiome	- immune system - antioxidant protection	- division of keratinocytes - activation of fibroblasts
Products' pH 4.5 Nisinoxid® Gluconolactone (PHA acid) Azeloglycine Papaya extract Non-ionic gold and silver particles	DermaSooth P Pentapeptide-26 Extracts of sweet violet, sea buckthorn and borage Extracts of kiwi, papaya, cucumber, strawberry, peach, apple, raspberry Avocado oil	Gluconolactone (PHA acid) Encapsulated DMAE (deanol) Infra DNA-renewer

All formulations from the product line have a slightly acidic pH of 4.5, which promotes the acid-alkaline balance of the skin and strengthens protection against pathogens.

TREATMENT REGIMEN

Removal of make-up / skin cleansing

Soothing & Rejuvenating Cleansing Gel pH 4.5 (CP0129) - remove make-up, wash off with water.

Anti-Stress & Redness Peptide Toning Foam pH 4.5 (CD0229) - Apply 1 pump; massage into the skin with circular motions, allow to absorb. Instead of the foam, you can also use **Anti-Stress & Redness Peptide Toning Mist pH 4.5** (CD0230) - spray the product onto the skin, allow to absorb.

Peeling

Apply **Soothing & Rejuvenating Enzyme PHA Peel pH 4.5** (CP0422) onto the skin avoiding the eye area and membranes; after 5-10 minutes wash off with water and tone the skin.

Concentrates - Application: photodynamic PDT LASER LLLT or LED - R 650nm, Green 525nm or UV 420nm, sonophoresis or manually

DT Anti-Stress & Redness Soothing Peptide Serum pH 4.5 (CP184430)

Apply onto the skin and let it work for 5 minutes, do not wash off, for face, neck and under eye skin.

PDT DMAE Ultra Lift Serum pH 4.5 Soothing & Rejuvenating (CP184530)

Apply onto the skin and let it work for 5 minutes, do not wash off, for face, neck and under eye skin.

Mask - Aplikacja: fotodynamiczna PDT LASER LLLT lub LED - R 650nm, Green 525nm or UV 420nm, sonophoresis or manually

PDT DMAE Ultra Lift Mask pH 4.5 Soothing & Rejuvenating (CP0863)

Apply onto the skin and leave it on for 10 minutes. Do not wash off, remove any excess with a paper tissue. Avoid the eye area.

A selected **Plastic Mask** from the SPECIAL AESTHETICS line may be additionally applied

Treatment finish

DMAE Ultra Lift Day Cream SPF20 UVA/UVB/IR pH 4.5 (CD1481)

- Apply to the skin, spread gently.

Notes/advice for use of PDT products:

- light wavelength selection: mature, dry skin with signs of aging - R 650nm, skin with visible signs of erythema - Green 525nm, skin with signs of irritation and bacterial inflammatory lesions - UV 420nm
- application time - according to the treatment regimen and the device's instructions;
- the total time of the PDT Master® laser must not exceed 20 minutes

Number of treatments in a series
- 4-6 treatments; every 7-10 days.
Treatment time - up to 50 minutes

SENSITIVE SMART INFLABIOME

SOOTHING & REJUVENATING CLEANSING GEL pH 4.5, Anti Inflamm-Ageing & Redness, Microbiome Restore, Sensitive Skin Face & Neck

Gently and effectively removes impurities from sensitive skin, while helping to combat the symptoms of skin irritation and redness and providing microbiome and skin barrier regenerating, antioxidant and rejuvenating ingredients. Leaves the skin cleansed, smooth, without astringency, comforted, soothed and hydrated.
CP0129 500ml, CD0129 200ml

non-ionic gold particles,
non-ionic silver particles,
Nisinoxid® antibacterial and antioxidant system,
extracts of sweet violet, sea buckthorn, borage,
papaya, kiwi, cucumber, strawberry, peach,
apple and raspberry, betaine

ANTI-STRESS & REDNESS PEPTIDE TONING FOAM pH 4.5 Soothing & Rejuvenating Anti Inflamm-Ageing Microbiome Restore, Sensitive Skin Face & Neck

Soothing anti-stress toning foam with a peptide that inhibits the activity of the neuromediator Substance P. In addition, it reduces transepidermal water loss TEWL, improving hydration and the state of the epidermal barrier. Contains the antibacterial and antioxidant system Nisinoxid®, which supports the balance of the microbiome and strengthens the integrity of the skin barrier.
CD0229 200ml

Dermasooth P - multifunctional anti-inflammatory peptide,
non-ionic gold particles,
non-ionic silver particles,
Nisinoxid® antibacterial and antioxidant system,
high molecular weight hyaluronic acid,
extracts of sweet violet, borage, papaya, kiwi,
cucumber, strawberry, peach, apple and raspberry

Anti-Stress & Redness Peptide Toning Mist pH 4.5 Soothing & Rejuvenating Anti Inflamm-Ageing Microbiome Restore, Sensitive Skin Face & Neck

Soothing anti-stress toning mist with a peptide that inhibits the activity of the neuromediator Substance P. In addition, reduces transepidermal water loss TEWL, improving hydration and the state of the epidermal barrier. Contains Nisinoxid®, which supports the balance of the microbiome and strengthens the integrity of the skin barrier.
CD0230 100ml

Dermasooth P - multifunctional anti-inflammatory peptide,
non-ionic gold particles,
non-ionic silver particles,
Nisinoxid® antibacterial and antioxidant system,
high molecular weight hyaluronic acid,
extracts of sweet violet, borage, papaya

SOOTHING & REJUVENATING ENZYME PHA ACID PEEL pH 4.5 Anti Inflamm-Ageing & Redness, Microbiome Restore, Sensitive Skin Face & Neck

Enzymatic peeling with gluconolactone PHA acid for sensitive skin. Gently exfoliates and removes dead skin cells while helping to combat the symptoms of irritation and redness. Provides the skin with moisturising, microbiome and skin barrier regenerating, antioxidant and rejuvenating ingredients.
CP0422 30ml, CD042250 50ml

papain,
gluconolactone PHA,
high molecular weight hyaluronic acid,
non-ionic gold particles,
non-ionic silver particles,
Nisinoxid® antibacterial and antioxidant system,
extracts of papaya, kiwi, cucumber, strawberry,
peach, apple and raspberry, avocado oil,
vitamin E

PDT ANTI-STRESS & REDNESS SOOTHING PEPTIDE SERUM pH 4.5 Anti Inflamm-Ageing, Microbiome Restore, Sensitive Skin Face & Neck & Eyes

Soothing anti-stress peptide serum to reduce symptoms of inflammation, redness and skin discomfort due to neurogenic stress and other irritants. Reduces itching and burning sensations and provides microbiome and skin barrier regenerating, antioxidant and rejuvenating ingredients. Helps to restore the comfort of the skin, leaving it calmed, smoothed by improved hydration, with an even skin tone. Prevents premature ageing.

Application: photodynamic PDT LASER LLLT or LED - R 650nm, Green 525nm or UV 420nm, sonophoresis or manually
CP184430 30ml

Dermasooth P - multifunctional anti-inflammatory peptide,
non-ionic gold particles,
non-ionic silver particles,
brightening azelogyline,
Nisinoxid® antibacterial and antioxidant system,
high molecular weight hyaluronic acid,
extracts of sweet violet, borage, sea buckthorn,
papaya,
vitamin E

PDT DMAE ULTRA LIFT SERUM pH 4.5 SOOTHING & REJUVENATING, Anti Inflamm-Ageing, Microbiome Restore, Sensitive Skin Face & Neck & Eyes

PDT serum with DMAE intensively lifting, with anti-wrinkle properties, enhances face oval and soothes, reduces signs of irritation and redness. Thanks to its lifting action and simultaneous regeneration of the microbiome and strengthening of the skin barrier, combats signs of inflammatory and premature ageing. Helps to restore the comfort of the skin, leaving it rejuvenated, with enhanced firmness and smoothed wrinkles, hydrated, calmed, soft, with an improved skin tone.

Application: photodynamic PDT LASER LLLT or LED - R 650nm, Green 525nm or UV 420nm, sonophoresis or manually
CP184530 30ml

Encapsulated DMAE (Deanol),
non-ionic gold particles,
non-ionic silver particles,
Nisinoxid® antibacterial and antioxidant system,
high molecular weight hyaluronic acid,
extracts of sweet violet, borage, sea buckthorn,
kiwi, papaya, cucumber, strawberry, peach,
apple, raspberry,
vitamin E

PDT DMAE ULTRA LIFT MASK pH 4.5 SOOTHING & REJUVENATING, Anti Inflamm-Ageing, Microbiome Restore, Sensitive Skin Face & Neck

Ultra-lifting mask with DMAE to regenerate the microbiome and skin barrier, hydrate, reduce signs of irritation, combat ageing caused by inflammation and premature ageing. Contains encapsulated DMAE, an intensive rejuvenating ingredient - with lifting, anti-inflammatory, hydrating and antioxidant properties - with an extended release for up to 12 hours after application. The mask is rich in moisturising and soothing ingredients.

Application: photodynamic PDT LASER LLLT or LED - R 650nm, Green 525nm or UV 420nm, sonophoresis or manually
CP0863 200ml

Encapsulated DMAE (Deanol),
non-ionic gold particles,
non-ionic silver particles,
brightening azelogyline,
Nisinoxid® antibacterial and antioxidant system,
high molecular weight hyaluronic acid,
extracts of sea buckthorn, kiwi, papaya,
cucumber, strawberry, peach, apple, raspberry,
vitamin E, beeswax,
Shea butter, avocado oil

DMAE ULTRA LIFT DAY CREAM SPF20 UVA/UVB/IR HEV pH 4.5 SOOTHING & REJUVENATING, Anti Inflamm-Ageing, Microbiome Restore, Sensitive Skin Face & Neck

Ultra-lifting day cream with DMAE with UV and IR HEV sun protection to regenerate the microbiome and skin barrier, moisturise, reduce signs of irritation, combat ageing caused by inflammation and premature ageing. Contains encapsulated DMAE, an intensively rejuvenating ingredient - with lifting, anti-inflammatory, hydrating and antioxidant properties - with an extended release for up to 12 hours after application.
CD1481 50ml

Encapsulated DMAE (Deanol),
non-ionic gold particles,
non-ionic silver particles,
brightening azelogyline,
Nisinoxid® antibacterial and antioxidant system,
high molecular weight hyaluronic acid,
extracts of sweet violet, borage, sea buckthorn,
kiwi, papaya, cucumber, strawberry, peach,
apple, raspberry, vitamin E, beeswax,
shea butter, avocado oil

SENSITIVE SMART INFLABIOME

PROFESSIONAL & HOME CARE
SENSITIVE SMART INFLABIOME PRODUCTS

ANTI-STRESS & REDNESS PEPTIDE NIGHT CREAM pH 4.5 Soothing & Rejuvenating Anti Inflamm-Ageing, Microbiome Restore, Sensitive Skin Face & Neck & Eyes

Soothing anti-stress peptide night cream to reduce symptoms of inflammation, redness and skin discomfort due to neurogenic stress and other irritants. Contains a peptide that inhibits the activity of the neuromediator Substance P. Additionally, reduces transepidermal water loss TEWL, improving hydration and epidermal barrier function. CD1482 50ml

Dermasooth P - multifunctional anti-inflammatory peptide,
non-ionic gold particles,
non-ionic silver particles,
brightening azelogyline,
Nisinoid® antibacterial and antioxidant system,
high molecular weight hyaluronic acid,
extracts of sweet violet, borage, sea buckthorn,
papaya, kiwi, cucumber, strawberry, peach, apple
and raspberry, shea butter, avocado oil, vitamin E

SOOTHING ANTI-STRESS & REDNESS PEPTIDE SERUM pH 4.5 Anti Inflamm-Ageing, Microbiome Restore, Sensitive Skin Face & Neck & Eyes

Soothing anti-stress peptide serum to reduce symptoms of inflammation, redness and skin discomfort due to neurogenic stress and other irritants. Reduces itching and burning sensations and provides microbiome and skin barrier regenerating, antioxidant and rejuvenating ingredients. Helps to restore the comfort of the skin, leaving it calmed, smoothed by improved hydration, with an even skin tone. Prevents premature ageing. CD120630 30ml

Dermasooth P - multifunctional anti-inflammatory peptide,
non-ionic gold particles,
non-ionic silver particles,
brightening azelogyline,
Nisinoid® antibacterial and antioxidant system,
high molecular weight hyaluronic acid,
extracts of sweet violet, borage, sea buckthorn,
papaya, vitamin E

DMAE ULTRA LIFT SERUM pH 4.5 REJUVENATING & SOOTHING, Anti Inflamm-Ageing, Microbiome Restore, Sensitive Skin Face & Neck & Eyes

PDT serum with DMAE, intensively lifting, with anti-wrinkle properties, enhances face oval and soothes, reduces signs of irritation and redness. Thanks to its lifting action and simultaneous regeneration of the microbiome and strengthening of the skin barrier, combats signs of inflammatory and premature ageing. Helps to restore the comfort of the skin, leaving it rejuvenated, with enhanced firmness and smoothed wrinkles, hydrated, calmed, soft, with an improved skin tone. CD120730 30ml

Encapsulated DMAE (Deanol),
non-ionic gold particles,
non-ionic silver particles,
Nisinoid® antibacterial and antioxidant system,
high molecular weight hyaluronic acid,
extracts of sweet violet, borage, sea buckthorn,
kiwi, papaya, cucumber, strawberry, peach, apple,
raspberry,
vitamin E

DMAE ULTRA LIFT MASK pH 4.5 SOOTHING & REJUVENATING, Anti Inflamm-Ageing, Microbiome Restore, Sensitive Skin Face & Neck

Ultra-lifting mask with DMAE to regenerate the microbiome and skin barrier, hydrate, reduce signs of irritation, combat inflammation and premature ageing. Contains encapsulated DMAE, an intensively rejuvenating ingredient - with lifting, anti-inflammatory, hydrating and antioxidant properties - with an extended release for up to 12 hours after application. CD0864 5ml

Encapsulated DMAE (Deanol),
non-ionic gold particles,
non-ionic silver particles,
brightening azelogyline,
Nisinoid® antibacterial and antioxidant system,
high molecular weight hyaluronic acid,
extracts of sea buckthorn, kiwi, papaya, cucumber,
strawberry, peach, apple, raspberry, vitamin E,
beeswax, shea butter, avocado oil

ACTIVE INGREDIENTS

DERMASOOTH P PEPTIDE Pentapeptide-26 - a multifunctional anti-inflammatory peptide for irritated and sensitive skin with anti-inflammatory, anti-irritant and anti-ageing properties confirmed by clinical studies. The peptide inhibits the activity of the neuromediator Substance P, thus reducing inflammation and irritation in the skin. It reduces skin redness, discomfort and itching. In addition, it reduces transepidermal water loss TEWL and provides protection against UV radiation.

ENCAPULSATED DMAE (DEANOL) Dimethylaminoethanol bitartrate - Encapsulated rejuvenating active ingredient - with lifting, anti-inflammatory and antioxidant properties - a precursor of acetylcholine (a neurotransmitter), improves the overall appearance of the skin, ensuring both immediate and long-lasting effects. It has anti-ageing and wrinkle-reducing as well as strong anti-inflammatory, antioxidant and moisturising properties, expressly combating the signs of skin ageing. The effect is rejuvenated skin with improved skin tone, increased firmness and smoothed wrinkles.

NISINOXID® antibacterial and antioxidant CHANTARELLE proprietary system with nisin peptide to support the balance of the microbiome and an antioxidant complex of sodium levulinate and anisic acid sodium salt to regenerate the integrity of the epidermal barrier. It has strong rejuvenating and regenerating properties and a proven efficacy against Gram-positive and Gram-negative bacteria, moulds and fungi.

NON-IONIC GOLD PARTICLES - stimulate collagen synthesis, the deficiency of which causes skin sagging and wrinkles. They also have strong moisturising, brightening and smoothing as well as regenerative, restorative and antibacterial properties, thus counteracting skin inflammation.

SILVER NON-IONIC SILVER PARTICLES - have strong antibacterial, antifungal and antiviral properties, helping to combat skin imperfections with dermatoses, including skin inflammation and signs of irritation.

GLUCONOLACTONE (PHA) is an important nutrient in the cell renewal process and a natural antioxidant that effectively fights free radicals and enhances the skin's repair, defence and protective mechanisms against the effects of ultraviolet radiation and environmental pollutants.

AZELOGLYCINE is a modern combination of azelaic acid and glycine amino acids with intensive brightening, moisturising, soothing and anti-inflammatory properties.

INFRA DNA REMOVER - provides special antioxidant protection against infrared radiation, in particular IR-A, and against HEV blue light.

The active formula also contains: **Hyaluronic ACID (1MDa)**, **BETAINE**, **extracts of sweet violet**, **sea buckthorn**, **borage**, **kiwi**, **papaya**, **cucumber**, **strawberry**, **peach**, **apple** and **raspberry**, **AVOCADO OIL**, **SHEA BUTTER**, **vitamin E**.

BIOCHROMOPHORES - proprietary biochromophores developed by CHANTARELLE for PDT LASER LLLT or LED photodynamic treatments.
